Improvements in Innovation Portfolio Management of RadboudUMC

Increasing the leadership role
through continuous improvements
in healthcare innovations

“

*We were impressed by how quickly RevelX
pin-pointed our blind spots and we were able to
make major improvements thanks to their bold and
thorough advice.*

Innovation Labs

About the client

Radboudumc

Radboudumc is a university medical center located in the East of the Netherlands. Their mission is to have a significant impact on health & healthcare. They aim to be a front runner in the development of sustainable, innovative, and affordable healthcare.

The Challenge

Radboudumc Health Innovation Labs (HIL) have successfully developed various innovations over the years. However, to stay ahead of the game, the HIL management team felt the need to benchmark their stage gated process model and specifically improve on prioritization and evidence-based decision making.

The Solution

In close collaboration with management and innovation leads, we critically reviewed the current innovation process.

We discussed the major pain points, suggested improvements and co- designed the ideal, yet not existing, governance structure.

Results

The result of the review and co- design sessions was an adjusted innovation portfolio management process.

One of the major adjustments was to incorporate more explicit (passing) criteria and metrics per stage of the funnel. The process was also made applicable for all the innovation endeavors of Radboudumc.
